Flea Treatment Prep Sheet

Important: Clean, wash, and vacuum all areas before treatment is applied.
DO NOT WASH IMMEDIATELY AFTER TREATMENT.

General:

1. All floors, upholstered furniture and pet resting areas should be thoroughly vacuumed. Particular attention should be given to pest harborages (i.e.: along baseboards). Dispose of the vacuum bag outside.
2. Pick up all personal items (i.e.: clothes, books, toys, plants, etc.) off floors in all rooms.
3. All clothes, bedding etc. should be washed or at least dried on high heat for 20 minutes or reinfestation could occur.
4. Remove items stored under beds, under furniture, and on closet floors.
5. Begin a Vet approved flea treatment program such as Program or Advantage for all pets.
6. Cover fish tanks and disconnect filter and pump.

PLEASE DO NOT:

1. Do not use strong cleaners around the treatment area, if you need to clean areas that have been treated, use a vacuum, or sweep for at least 30 days. The product will last 30 – 60 days.
2. Do not "bomb" or "spray" anything after you have been treated.

PRECAUTION: When insecticide treatments are applied to enclosed areas or continuously occupied living of working spaces, people should vacate for 2 hours. Pets should vacate for 4 hours. Pregnant women, children under 2 years of age, and people with respiratory problems or health concerns should vacate for 6 hours and consult their doctor. Pet birds should be out for 24 hours. Fish aquariums, please unplug from wall and cover with a sheet or plastic.

AFTER TREATMENT:

1. Ventilate upon re-entry to the treated area by opening windows and doors.
2. DO NOT wash the floor or baseboards for a minimum of 8 weeks following treatment.
3. Avoid steam cleaning the carpets for 3 months.
4. Vacuum every day, especially along baseboards and under furniture cushions to create vibration on floors, not necessarily to clean.

Please Note: Flea activity may be observed for a couple of weeks after treatment. This is not unusual and may be due to newly hatched insects, which have not yet met the insecticide. The insects will eventually die.

****TENANTS WITH CHILDREN AGED 2 YEARS AND YOUNGER AND PETS MUST VACATE FOR 6 HOURS****
