Pantry Pest Treatment Prep Sheet

There are many types of beetles, weevils and moths that commonly infest cupboards. They find their way into your pantry by hitchhiking on food products, or in storage bags and boxes. We recommend you discard any infested items and thoroughly clean infested areas. Plan and follow the instructions below to prepare for successful professional treatment of your home.

General:

1. All cabinets must be completely empty. (Upper cabinets as well as lower cabinets.)
2. All items must be removed from the tops of counters AND cabinets.
3. The pantry must be completely emptied.
4. Do not store items removed from cabinet/pantry in same room that is to be treated.
5. All food must be removed from the kitchen. (Except food stored in the refrigerator.)
6. All infested food must be thrown away.
7. Remove and discard all infested material and food (including in and under sinks and cabinets).
8. Remove all food from top of fridge, counter tops, and cabinets. Empty kitchen cabinets and drawers.
9. Seal all food after opening (including pet food). Place food in tightly sealed containers or store in the refrigerator.
10. Keep garbage in closed containers and take garbage out every night.
11. Remove all clutter and debris (i.e., newspapers, boxes, bags, clothing, books, etc.).
12. Clean all kitchen and pantry surfaces, shelving and cabinets from food crumbs and debris.
13. All food not infested must be sealed in airtight containers. (Plastic bowls, glass jars, plastic bags, etc.;) For treatment to be successful we need your full cooperation. *For the best chance of first-time success when having a pantry pests treatment performed and for the safety, comfort, and health of all concerned, the following should be observed. All may not apply to your specific situation. If you have any questions, please just let us know.*

PLEASE DO NOT:

1. Do not use strong cleaners around the treatment area, if you need to clean areas that have been treated, use a vacuum, or sweep for at least 30 days. The product will last 30 – 60 days.
2. Do not "bomb" or "spray" anything after you have been treated.

PRECAUTION: When insecticide treatments are applied to enclosed areas or continuously occupied living of working spaces, people should vacate for 2 hours. Pets should vacate for 4 hours. Pregnant women, children under 2 years of age, and people with respiratory problems or health concerns should vacate for 6 hours and consult their doctor. Pet birds should be out for 24 hours. Fish aquariums, please unplug from wall and cover with a sheet or plastic.

****PREGNANT WOMEN AND CHILDREN AGED 2 YEARS AND YOUNGER MUST VACATE FOR 6 HOURS****
